PROJECTS

_____

To Do List :-

- Task Creation: Easily add tasks for organized planning.
- Task Deletion: Effortlessly remove completed or unwanted tasks for a clutter-free list.
- Intuitive Interface: User-friendly design ensures easy navigation and simplified actions for a straightforward experience.
- Tech Stack : Html | Css | Javascript .

Tic Toe Game :-

- we will create a **Tic-Tac-Toe Game** using JavaScript. We will be using validation checks to implement the game features.

- The UI is designed using CSS so it is easy to create. In the game, Player-1 starts playing the game and both players make their moves in consecutive turns.
- The player who makes a straight 3-block chain wins the game. This game is built on the front-end using simple logic and validation checks only.
- Tech Stack:- Html, Css and Javscript.

<u>Jarvis clone</u> :-

- This Project is done of Jarvis Website it is a stock Market website providing a visually appealing and also Mobile responsive and User experience .
- the website is responsive, adapting seamlessly to different screen sizes and devices, to provide a consistent user experience.
- we will also be using some icons in our project,so for that, we will be using the font-awesome icons website, where we can add different icons free of charge.
- Tech Stack:- Html, Css and Javascript.

<u>Food Hub</u> :-

- This project is create for buy selling foods it is not mobile responsive but it is user experience.
- Intuitive navigation with clear categories such as Recipes, , Food Blogs, Culinary Tips, and possibly a search bar for quick access to specific content.
- Tech Stack : Html | Css | Javascript.
